Joffre Halts Surprise Move Between the Oise and the Aisne.

London, Nov. 5. In the furious battle which is still in progress at the eastern end of the Champagne line the Germans have gained at two points. Northeast of La Mesnil, in the sector; of which La Courtine is the main position, Berlin claims the recapture of a trench which the French had held since Vladivostok Hopes to Get October 24. Further east, north of Mussiges, Paris admits that the enemy succeeded in penetrating the French first-line trench at Hill 199.

The communication issued at Paris his afternoon says:

Between the Aisne and the Oise, in the sectors of Puisaleine and Quennevieres, the enemy, after having attempted to surprise the men in our trenches by a spirited fusillade, directed against our positions a very violent, but at the same time a futile, bombardment.

In the Champagne district we have completely checked two fresh German attacks against our trenches in the position known as "Le Courtine." These attacks were conducted with hand grenades, and supported by the throwing of inflammable liquid.

Toulen. France, Nov. 5.—A naval ourt martial honorably acquitted tocourt martial honorably acquitted today Captain Forget, who was commander of the auxiliary cruiser L'Indien, torpedoed by a submarine near
the Island of Rhodes on September S.
L'Indien was formerly the French

to the Greco-Turco-American Company
which changed her name and pisced
her under the American flag, according to the French marine authorities,
for the purpose of carrying contraband. On this account she was selzed
by a French warship and taken into

into an auxiliary eruiser.

No previous report of the torpedoing of L'Indien has been received. It was learned a month ago, however, that a French auxiliary cruiser, whose name was not ascertained, had been torpedoed and sunk in September, while anchored off the Island of Rhodes, by a German submarine. This information was received in the form of private advices from Athens, and undoubtedly referred to L'Indien.

Serious Tie-Up Feared.

The New York steamship line which has the contract for delivering the new American rolling stock to Vladivostok will probably require about sixty ships for locomotives and cars. It was planned that all this freight would come by way of Panama, but not more than three ships bearing locomotives and cars passed through the canai before the big slide of September 18. Consequently, several ships were delayed before they were ordered to go the Suez way. The result will undoubtedly be that many ships carrying heavy cargoes will reach Vladivostok at the same time many weeks hence, and serious congestion is feared.

Japan is supplying Russia with great quantities of lead and copper which are delivered at Vladivostok. Shells, rines and big guns, some as large as twelve inches, are also being provided by the Japanese.
